

## WEB DEVELOPER

We're looking for a talented web developer to join the Torpedo team.

You need a real passion for coding and all things internet, plus advanced PHP, JavaScript, SQL/MySQL, XHTML and CSS skills. Knowledge of content management systems (ideally ModX) is essential, along with the ability to code for cross-browser and platform compatibility. Experience of Flash AS2 and AS3, iOS and Android development plus experience of other current web and mobile technologies would be beneficial.

Ideally you will have worked in a marketing, web or digital agency and have experience of delivering high quality web-based solutions to clients. You need to be able to take creative visuals and make them work with a good grasp of best practice online, search optimisation, accessibility and what people want (and don't want) from a usability perspective.

### **Expect to:**

- Help to recommend, plan and develop dynamic web and digital projects.
- Be involved at all stages of the design and development process.
- Liaise closely with the design and project management teams.
- Work to tight deadlines whilst providing colleagues and clients with exceptional service at all times.

Ultimately, we are after a bright, analytical, reliable and self motivated PHP Developer / Web Developer that wants to join an exciting creative agency that prides itself on building cutting edge creative and technical solutions. Expect a challenging and technical environment working on a broad range of both small and large digital projects.

Torpedo is an award winning creative marketing agency based near Oxford with some excellent clients and a great team. This is a fantastic opportunity to join our highly talented, creative and friendly team environment working with both existing and new clients.
